Email Alerts and RSS Feeds - IEEE (ASPP and POP)

Database alerting services allow you to select information of interest and then be notified regularly, via email or RSS feeds, of new information available. The tables of contents of specific journals, magazines, and newspapers, the output of search queries, and specific article citations can all be pushed to your email inbox or to an RSS reader. These services make it easier to stay on top of developments in your field of interest.

IEEE offers two types of alerts to Seneca College students, faculty and staff:

- Content Alerts
- Search Alerts

Users must register with IEEE to take advantage of these alerting services:

The username you set up has to be a full, valid e-mail address (though it does not have to be a Seneca e-mail address necessarily).

Content Alerts

1. Sign in to IEEE.
2. Under “My Settings” in the menu at the top of the screen, select the “Preferences” link:

You may set up Preferences for many things within IEEE (search options, display options, etc.), but for Alerts to work you must enter a full, valid e-mail address in the box on the right and then click “Update”. You may enter the same e-mail address you entered to set up your IEEE account or it may be a completely different one; just note that whatever you enter here is the address to which any Alerts you set up will be sent.

Please note that we do not subscribe to Standards nor eBooks in IEEE -- only Journals & Magazines and Conferences. You may set up alerts notifying you about Conferences, but the alerts are infrequent.

4. Put checkmarks in the boxes next to the journal or magazine titles you want to receive alerts for and then click the “Update” button. You will receive an e-mail when a new issue of that journal or magazine title has been posted online.

5. Alternatively, you may click on the little icon to establish an RSS news feed for that title. What appears when you click on it will depend on the Web browser you use and how RSS Feeds are set up through it. Follow the prompts to establish the feed and new tables of contents will be e-mailed to you.
1. Sign in to IEEE if not signed in already (see page 1).

2. If you have not already set up the e-mail address to which you want Alerts to be sent, see “Content Alerts” above, step 2, for information on how to do this in “My Settings” and “Preferences”.

3. On the IEEE homepage, click “Advanced Search”:
4. Please note that we do not subscribe to all of IEEE Xplore so you will want to put a checkmark in the box next to “My Subscribed Content”. Enter your subject(s) of interest in the search boxes and then click the “Search” button …
5. To be notified when new articles that match your search terms are added to IEEE, click “Set Search Alerts”. Give your saved search a name and then click the “Save” button. Alerts will be sent to the e-mail address you indicated in “My Settings” > “Preferences”.
